

Groups 1 + 1a + 4

1. M67 or NGC 188

↑ $N_0 \simeq 40000$, $f_{b0} \lesssim 100\% \Rightarrow ?$ 1 month/run

Pilot N-body calculations by Modest 5a
(Edinburgh, December '04)

Take decision then to continue or
switch to younger object.

MC: simplified pilot calculations
development required.

Scientific goals :

BS revisited

WD

binaries & their survival
the progenitor
a challenge in itself

2. 5-YEAR PLAN

= 1a

Time span of new observational projects

Example: binarity in g.c.
other data already available

To be continued this p.m.
