 - Ato Gürkan's FITS proposal
- NVO demo “globular clusters” at AAS (

The diagram shows a stack of four rectangular boxes representing data structures. From top to bottom, the boxes are labeled 'dyn', 'hydro', an empty box, and 'star'. To the left of the stack is the label 'Np' and to the right is 'Nt'. Lines connect the top of each box to the top of the next one below it, and a line connects the top of the 'star' box to the 'Nt' label. Below the 'star' box is the label 'Na'.
- NVO workshop Aspen (Sept 13-17)
- Whitepaper on Theory in the VO (Gerard Lemson)
- MODEST4a / MODEST5c (“*nbody school*”)
- Software:
 - NEMO, Starlab, partiview
 - *manybody* build system
